## Product highlights

**QuattroPulse** This new muffle construction concept circulates the warm air flow in the cavity with increased speed, thus evenly distributing the heat. The result: successful and even baking at all levels of the oven.

**SmartAssist** This function suggests a cooking time appropriate to each of the oven's functions: programming becomes quick and convenient.

**Glass on Stainless Steel Brandt Design** Dynamic, reassuring and understated, the design asserts Brandt's elegance: a wide handle and a comfortable grip, a slim control panel that can be easily integrated into your kitchen, and high-quality materials such as glass and stainless steel.
