Product highlights

Combined heat This cooking method combining rotating/pulsed heat and natural convection is ideal for ζ moist ζ cooking such as pizzas, quiches and tarts. Keep the crispy outside and the softness in!

Drying function The function allows you to dehydrate fruit, herbs or vegetables at a controlled temperature. Preventing the growth of bacteria and preserving the minerals and vitamins in food. This process allows them to be stored for several months.

Low Temperature cooking This exclusive function cooks meat, poultry and fish evenly, evenly and gently below 100°. This perfectly controlled cooking process produces dishes of incomparable tenderness.
